

• Begin at 'M' count every 5 items
then cross out

M A S H
ex = 1 2 3 4

(not category name)
only #¹ 5 + MASH).
move counter-
clockwise

• count spiral's
lines (ex=5)

category (pet)

etc.

1) User inputs 3 values

for each category (prompts?)
(arrays?)

*should have

'Story' text
in each step

to explain.

2) Spiral begins

3) User says STOP

4) spiral is counted (pre-MV, may
just be timed)

5) # is shown

6) every (#) item is

crossed off (whole

7) continue until
only 1(*) left
each category (iterations)

8) display (Future loops)

(branching thing in
statements, objects)?
